

**BARLOW**  
TECHNOLOGY

# Company Overview

---

Barlow Technology is an industry leader in the sourcing and delivery of innovative products and engineering services to global companies working at the heart of heavy industry.

Working with exclusive European partners, we offer market-leading solutions, using the latest manufacturing processes; delivered in a cost and time-efficient manner, providing the perfect solution with regards application, location and environmental conditions.

Ideally suited to harsh environments, our high-performance products offer solutions within the steel, container handling, marine, offshore, ports and harbours, mining, rail, paper and renewable energy sectors.

## Encoder Systems

Barlow Technology supplies a range of robust encoders and drive control systems from Johannes Hubner Giessen, a world leader in the manufacture of state of the art, engineering solutions for heavy industry.

## Braking Systems

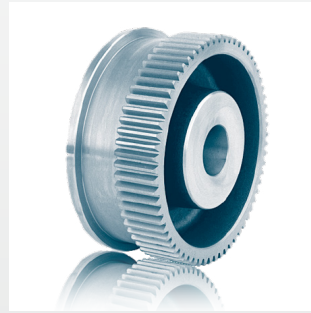

Barlow Technology is the sole representative in the United Kingdom for Dellner Bubenzer, an industry-diverse global leader in the design and manufacture of braking systems for the global heavy industry sector.

## Motors & Drive Solutions

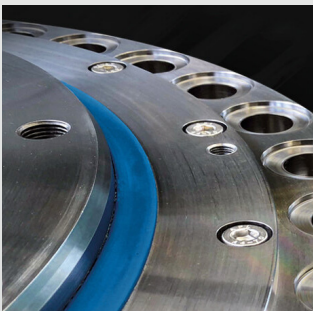

As the representative and sole supplier for German based VEM Motors, Barlow Technology provides an extensive range of innovative, technically sophisticated motors and drive solutions and associated parts across the UK and Ireland.

## Steel Wheels & Tyres

Barlow Technology has an established history in the supply of German manufactured steel wheels, pulley sheaves, wheel blocks and wheel sets and accessories. Offering tailored solutions for specialist applications; with the back-up of an exceptional service and maintenance level.

## Couplings

An established relationship with The Malmédie Group allows Barlow Technology to supply power transmission systems and mechanical couplings from the original manufacturer, recognised across the global steel and ports industries.

## Special Products

As a leader in the supply of uniquely engineered products, we can undertake both reverse engineering and precision machining and are additionally able to source a range of industry products, designed to suit your requirements, including fabrications, mill end covers, castors, toothed segments, pinions and castings.
